

WEEKS AHEAD AI | RelayHub

Summer 2026 AI Implementation Intern Program

Not just an internship. A career-defining summer.

ABOUT THE PROGRAM

Weeks Ahead AI is deploying 10–12 college interns as embedded AI implementation specialists inside real businesses this summer. Interns work directly with client companies applying cutting-edge AI tools to solve actual operational challenges.

Interns are mentored weekly by Weeks Ahead AI co-founders Brad Andrus, Mitch Felderhoff, and Terry Brockett, seasoned operators with direct, hands-on experience across commercial real estate, equipment, construction, banking, and professional services.

PROGRAM DETAILS

Duration: May – August 2026 (12 weeks)

Schedule: Hybrid: 3–4 days/week at client site + 1 group session/week

Mentorship: Weekly group sessions + 1-on-1 mentor check-ins

Cohort Size: 10–12 interns (competitive selection)

Compensation is available depending on experience and need.

WHAT INTERNS DO

- Conduct data and process audits at assigned client companies
- Implement [RelayHub](#) workflows and additional AI tools tailored to each business
- Build dashboards & establish automation SOPs
- Document measurable business impacts: time savings, cost reduction, efficiency gains
- Present findings and recommendations to business owners and leadership

WHO SHOULD APPLY

Juniors and seniors majoring in:

- Finance & Accounting
- Business & Entrepreneurship
- Construction Management
- Marketing & Communications
- Technology & Information Systems

THE WEEKS AHEAD AI INTERN DIFFERENCE

By summer's end, each intern will have deployed real AI implementations at real companies, built a portfolio of quantifiable business results, and earned the title every employer is looking for: **AI Operations Specialist**. *We are not staffing an internship; we are building the next generation of AI operators.*
